

Medical Camp: Kindness and generous created a boy life

In Malayankulam village of Cheranmahadevi Block SEC has been functioning since November 2014. Selvam, 13 years old boy is studying VIII std and he also regularly attended SEC. His parents are illiterate and casual worker. He is poor in reading and writing in Tamil and all other subjects. The SEC teacher has observed that his behaviour is abnormal and also lack of interest in studies. Later on medical camp was organized during February 2015 in Moolachi village, at that time the SEC teacher informed the behaviour of Selvam to the medical personnel. The doctor diagnosed him and pointed out that he is suffering with Mild Mentally Retarded defect and advised him to refer Dept. of Psychiatry, Govt. Medical College Hospital, Tirunelveli. Later on it was informed to his parents and with their consent he is taken into District Govt. Hospital. Now, he is undergone with treatment. Thus medical camp exposes the health status of kids to their ill literate parents and follow up action.
